

CESPK-ED-M MEMO

7 July, 2001

To: Chief, Engineering Division

From: Coordinator, Adopt-A-School Program

Subject: Program Evaluation, FY 01

1. The program continued through another successful year. The enclosed chart summarizes the presentations made at various sites. As always, we continued to focus our primary support at Kennedy High School. Attendance at JFK High continues to be outstanding: averaging 65 with a high of 90 at one time. Again all presentations took place in the school library. Speakers came from ED (Mil Des, Civ Des, HTRW), Con-Ops, Office of Counsel, Safety Office, and PPMD.) I accompanied all speakers- primarily to maintain a consistent presence and introduce the speakers, but also to prompt questions that might interest the students.
2. We have continued our support of the career days at Einstein Middle School and Will C. Wood Middle School. We added a new career day event at Cal Middle School. This expanded participation reflects better organization by the Sacramento School District.
3. A new opportunity also became available at Kennedy High School: they conducted their first school-wide career day. It was organized by interested parents with some assistance by assigned staff. While a little rough around the edges, it should go smoother in the future and promises to be a regular event in the Spring. Because of this new event, presentation dates were juggled and one was cancelled.
4. We do not travel as far as we used to for career day presentations. It appears that as school districts continue to establish and nurture long-term career programs, they do not need to search far and wide for support among the business community. This has freed us to focus more on the closest school district.
5. Overall, this community outreach experience remains good for all people and it is recommended that we continue our involvement with the local schools. It gives the technical staff presentation practice in front of an audience and it gives the company positive public exposure.
